entrepreneurship to
boost VET students'
employability &
resilience

CIRCULAR ECONOMY & ENTREPRENEURSHIP TO BOOST VET STUDENTS' EMPLOYABILITY AND RESILIENCE

Our project proposes a programme that will help young people and VET students in particular to know more about circular economy and entrepreneurship and use them as motivator for personal improvement.

During the project, the partner will create micro-lessons on circular economy, entrepreneurial skills, and other transversal skills that are key to boost their ability to compete on the labour market.

BENEFITS FOR VET SCHOOLS

The library relieves educators of content preparation, enabling a focus on skill facilitation and validation. These materials address employers' needs and foster skills relevant to positive corporate impact, enhancing knowledge of sustainability, circular economy, and entrepreneurship for issue-solving proficiency in their profession.

BENEFITS FOR VET STUDENTS

Students gain enhanced soft and transversal skills, key 21st-century labor market competencies with a circular economy perspective. They learn to adapt to future uncertainties with improved problem-solving skills, and a heightened sense of their long-term impact. This also elevates employability and sustainability awareness, fostering circular economy expertise for a greener lifestyle in alignment with EU27 objectives.
