

ENHANCE – Empowering Girls and Young Women Across Europe and the MENA Region

Framework Hosts Project Management Training Camp in Turin

As part of the ENHANCE project, our association Framework successfully organized a Project Management Training Camp in Turin, Italy, on 22nd and 23rd May 2025. The training was designed for our partners from non-EU countries—Morocco, Egypt, and Jordan—with the participation of our EU partners RJ4ALL (Cyprus) and EUNOIA (North Macedonia).

The Framework team ensured all participants received quality accommodation and a smooth, well-organized training experience, prioritizing their comfort and expectations throughout their stay in Turin.

To ensure the effectiveness of the training, all materials were provided in both English and Arabic, helping participants fully understand the content and gain maximum benefit. The training aimed to equip attendees with the knowledge and tools needed to successfully implement the ENHANCE project and plan future initiatives effectively. The sessions were engaging and delivered through a mix of theoretical input, interactive activities, and small group discussions. All participants expressed high satisfaction with the structure and delivery of the training, highlighting the development of their project management skills and overall capacity building. Framework remains committed to empowering its partners and supporting the success of the ENHANCE project through meaningful and inclusive training opportunities.
